

The Econo Tube™

FEATURES AND BENEFITS

- Most economical.
- Especially designed to reduce popping during centrifugation, freezing, storing or shipping.
- Reinforced bottom for added protection against leakage.
- Can be used up to 20,000g.

Made of polypropylene

The most economical in the Simport Microcentrifuge Tube Family, this 1.5mL graduated rugged tube is made of a polypropylene suitable to withstand the stress of high speed centrifugation up to 20,000g.

The tube interior is highly polished to ensure low liquid retention and maximum sample recovery. The bottom is reinforced for added protection against leakage.

The one-piece construction incorporates a snug fitting and reliable attached cap. A frosted writing surface on closure and side of tube allows for easy and convenient sample identification.
